

Sustainable Upgrade

Comparison	EndoPilot 1 mobile	EndoPilot 2
		
Battery type	Nickel metal hydride normal energy density	Lithium-ion high charging capacity with low weight
Battery operation in hours	4	16
Apex measurement	A microprocessor processes apex measurement and motor control alternately	Two microprocessors process apex measurement and motor control independently of each other: more precise length determination
Drive types	Full rotation / reciprocal	Full rotation / reciprocal reflex movement
Reciprocating preparation (new patented ReFlex movement pattern)	not possible	already implemented
Improved display	monochrome, blue white	Color display
File images	no	Yes
Modular extension for thermoplastic obturation	possible, but: The DownPack and motor must be reconnected. BackFill only possible in mains operation	Possible at any time, no reconnection necessary
Modular extension for ultrasound	yes, with CoPilot	Yes
Radio foot switch	older Bluetooth standard	Improved connection, filter protects against interference signals
Update	Extra hardware required. Reader must be sent. Chargeable	Online simply by download. Free of charge
Future software developments	Storage capacity is exhausted	50% storage capacity is still available, file database almost unlimited
Sound	Beep sound	Different melodies, adjustable volumes
Cable routing	visible from the front	lateral or concealed
110 0201-BT		790,00 €

Upgrade set "EndoPilot mobile" to EndoPilot²

consisting of:

- 110 2010 EndoPilot with 7" touch display
- 110 2303 Retaining bracket for apex cable
- 110 2301 Motor bracket, right

Please return the old device to us after receiving the new EndoPilot.
Handpieces shown are not part of the upgrade set

plus VAT and shipping costs

Comparison	EndoPilot 1 Comfort	EndoPilot 2
		
Battery type	No battery operation possible	Lithium-ion high charging capacity with low weight
Battery operation in hours	--	16
Apex measurement	A microprocessor processes apex measurement and motor control alternately	Two microprocessors process apex measurement and motor control independently of each other: more precise length determination
Drive types	Full rotation / reciprocal	Full rotation / reciprocal reflex movement
Reciprocating preparation (new patented ReFlex movement pattern)	not possible	already implemented
Improved display	monochrome, blue white	Color display
File images	no	Yes
Modular extension for thermoplastic obturation	possible, but: The DownPack and motor must be reconnected. BackFill only possible in mains operation	Possible at any time, no reconnection necessary
Modular extension for ultrasound	yes, with CoPilot	Yes
Radio foot switch	not available, cable foot switch	Improved connection, filter protects against interference signals
Update	Extra hardware required. Reader must be sent. Chargeable	Online simply by download. Free of charge
Future software developments	Storage capacity is exhausted	50% storage capacity is still available, file database almost unlimited
Sound	Beep sound	Different melodies, adjustable volumes
Cable routing	visible from the front	lateral or concealed
110 0202		935,00 €

Upgrade set EndoPilot "comfort" to EndoPilot²

consisting of:

- 110 2010 EndoPilot with 7" touch display
- 110 2303 Retaining bracket for apex cable
- 110 2301 Motor bracket, right
- 109 2361 Radio foot switch, single
- 509 0410 AC /DC adapter cable

Please return the old device to us after receiving the new EndoPilot.
Handpieces shown are not part of the upgrade set

plus VAT and shipping costs

Comparison	EndoPilot 1 comfort plus	EndoPilot 2 plus
		
Battery type	No battery operation possible	Lithium-ion high charging capacity with low weight
Battery operation in hours	--	16
Apex measurement	A microprocessor processes apex measurement and motor control alternately	Two microprocessors process apex measurement and motor control independently of each other: more precise length determination
Drive types	Full rotation / reciprocal	Full rotation / reciprocal reflex movement
Reciprocating preparation (new patented ReFlex movement pattern)	not possible	already implemented
Improved display	monochrome, blue white	Color display
File images	no	Yes
Modular extension for thermoplastic obturation	Already available	Already available, no replugging necessary
Modular extension for ultrasound	yes, with CoPilot	Yes
Radio foot switch	not available, cable foot switch	Improved connection, filter protects against interference signals
Update	Extra hardware required. Reader must be sent. Chargeable	Online simply by download. Free of charge
Future software developments	Storage capacity is exhausted	50% storage capacity is still available, file database almost unlimited
Sound	Beep sound	Different melodies, adjustable volumes
Cable routing	visible from the front	lateral or concealed
110 0203		965,00 €

Upgrade set EndoPilot "comfort plus" to EndoPilot² plus

consisting of:

- 110 2010 EndoPilot with 7" touch display
- 110 2303 Retaining bracket for apex cable
- 110 2301 Motor bracket, right
- 110 2302 Handpiece holder, left
- 109 2361 Radio foot switch, single
- 509 0410 AC /DC adapter cable

Please return the old device to us after receiving the new EndoPilot.
Handpieces shown are not part of the upgrade set

plus VAT and shipping costs

Comparison	EndoPilot 1 ultra	EndoPilot 2 ultra
		
Battery type	Standard gel battery	Lithium-ion high charging capacity with low weight
Battery operation in hours	2	16
Apex measurement	A microprocessor processes apex measurement and motor control alternately	Two microprocessors process apex measurement and motor control independently of each other: more precise length determination
Drive types	Full rotation / reciprocal	Full rotation / reciprocal reflex movement
Reciprocating preparation (new patented ReFlex movement pattern)	not possible	already implemented
Improved display	monochrome, blue white	Color display
File images	no	Yes
Modular extension for thermoplastic obturation	possible, but BackFill function depends on the condition of the battery, otherwise only possible in mains operation	Possible at any time, no reconnection necessary
Modular extension for ultrasound	Already available	Already available
Radio foot switch	older Bluetooth standard	Improved connection, filter protects against interference signals
Update	Extra hardware required. Reader must be sent. Chargeable	Online simply by download. Free of charge
Future software developments	Storage capacity is exhausted	50% storage capacity is still available, file database almost unlimited
Sound	Beep sound	Different melodies, adjustable volumes
Cable routing	visible from the front	lateral or concealed
110 0204		1.240,00 €

Upgrade set EndoPilot "ultra" to EndoPilot² ultra

consisting of:

- 110 2010 EndoPilot with 7" touch display
- 110 2303 Retaining bracket for apex cable
- 110 3201 Ultrasound module for EndoPilot²

Please return the old device to us after receiving the new EndoPilot.
Handpieces shown are not part of the upgrade set
